

Considering CRP? Play it SAFE

Attention Oklahoma Landowners Interested in CRP!

The USDA's Farm Service Agency Conservation Reserve Program (CRP) signup is now open! As part of the general CRP signup, landowners are given the option to enroll cover that provides valuable habitat for some of Oklahoma's iconic wildlife species. The CRP cover option CP-38E - State Acres for Wildlife Enhancement (SAFE), looks to restore grasslands to benefit Northern bobwhite quail and the monarch butterfly. The restoration will also provide habitat for a number of other grassland wildlife species. The wildlife benefits of SAFE are in addition to the indirect benefits CRP provides in improved water and air quality, reduced soil erosion, and outdoor recreation.

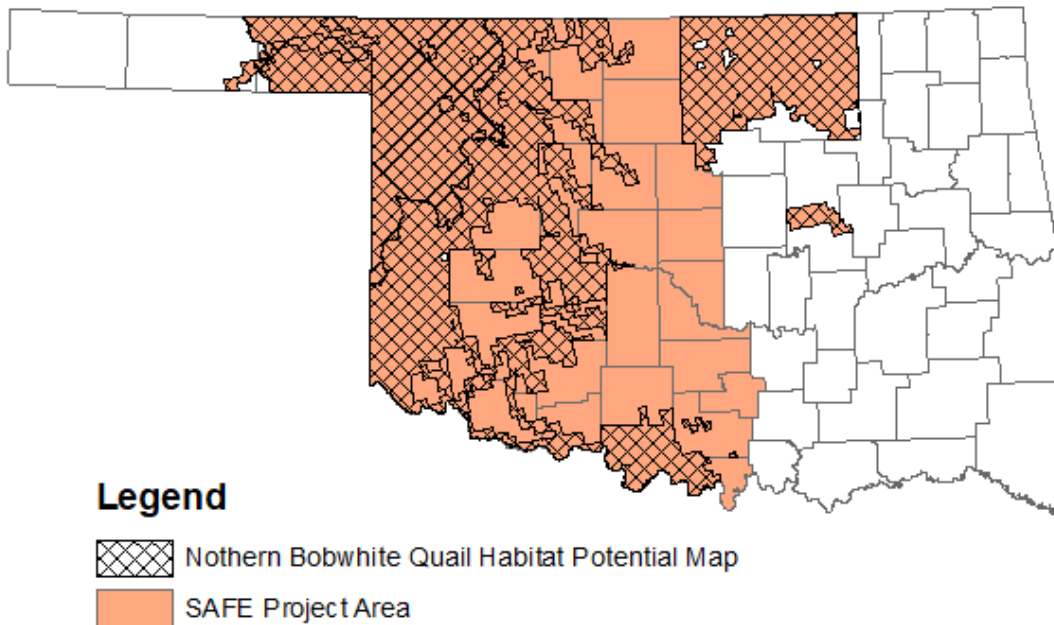

To be eligible for CRP land must be cropland that was planted, or considered planted, to an agricultural commodity four of the six crop years from 2012-2017, and be physically and legally capable of being planted in a normal manner to an agricultural commodity. Expiring CRP acres are also eligible, provided they can or will meet the cover requirements.

Your local USDA field office (found at <https://www.farmers.gov/service-center-locator>) can explain SAFE cover requirements. SAFE is targeted to certain areas of the state and may not be eligible for everyone (see map below). However, many cover options within CRP can be enhanced to provide wildlife habitat.

The CRP signup is going on right now through February 12, 2021.

Farm the best, CRP the rest!

## Farm Service Agency

# Conservation Reserve Program

General Signup 56 Enrollment Period  
Jan. 4, 2021 through Feb. 12, 2021

**FACTSHEET**  
January 2021

### Overview

USDA's Farm Service Agency (FSA) will conduct a Conservation Reserve Program (CRP) general enrollment from Jan. 4, 2021, through Feb. 12, 2021.

CRP is a federally-funded voluntary program that contracts with agricultural producers so that environmentally sensitive agricultural land is not farmed or ranched, but instead devoted to conservation benefits. CRP participants establish long-term, resource-conserving plant species, such as approved grasses or trees (known as "covers") to control soil erosion, improve water quality and develop wildlife habitat. In return, FSA provides participants with rental payments and cost-share assistance. Contract duration is between 10 and 15 years. Accepted contracts for this CRP enrollment period will become effective Oct. 1, 2021.

CRP is authorized by the Food Security Act of 1985 and was reauthorized by the Agricultural Improvement Act of 2018 (the 2018 Farm Bill). FSA administers CRP, while other USDA agencies and partners provide technical support. Additional information on CRP is available in the FSA fact sheet, "**Conservation Reserve Program.**"

### Submitting CRP Offers

Land that is not currently enrolled in CRP may be offered for enrollment during this CRP general enrollment period. In addition, CRP producers whose CRP contracts are expiring on Sept. 30, 2021, including acres expiring from certain State Acres for Wildlife Enhancement (SAFE) practices and the Highly Erodible Lands Initiative (HELI) contracts may submit offers.

To submit CRP offers, producers must contact their local FSA office. FSA will accept offers only during the enrollment period.

### Who is Eligible?

To be eligible for CRP enrollment, a producer must have owned or operated the land for at least 12 months prior to the end of this CRP enrollment period, unless:

- The new owner acquired the land due to the previous owner's death;
- The ownership change occurred due to foreclosure where the owner exercised a timely right of redemption in accordance with state law; or
- The circumstance of the acquisition presents adequate assurance to FSA that the new owner did not acquire the land for the purpose of placing it in CRP.

### What Land is Eligible?

To be eligible for the CRP general enrollment period, land must be cropland (including field margins) that is planted, or considered planted, to an agricultural commodity four of the six crop years from 2012 to 2017, and be physically and legally capable of being planted (no planting restrictions due to an easement or other legally binding instrument) in a normal manner to an agricultural commodity. Alfalfa or other multiyear grasses and legumes grown in a rotation not to exceed 12 years may also be eligible.

## Additional Cropland Requirements

In addition to the eligible land requirements for the CRP general enrollment period, cropland must meet one of the following criteria:

- Have a weighted average erosion index of eight or higher;
- Be expiring CRP acres; or
- Be located in a national or state CRP conservation priority area.

## CRP Payments

FSA provides those applicants who are selected for CRP general enrollment with annual rental payments and cost-share assistance.

- **Rental Payments:** In return for establishing long-term, resource-conserving covers, FSA provides rental payments to participants. FSA bases rental rates on the relative productivity of the soils within each county and the average dryland cash rent subject to a statutory 85 percent proration. County office staff working with the producer will calculate the maximum CRP rental rate for each offer prior to enrollment. Producers may offer land below the rate to increase the likelihood that their offer will be accepted.
- **Cost-Share Assistance:** FSA provides cost-share assistance to participants who establish approved cover on eligible cropland. The cost-share assistance cannot exceed 50 percent of the participant's costs to establish approved practices.

## Ranking CRP Offers

FSA will rank offers for the CRP general enrollment period according to the Environmental Benefits Index (EBI). FSA collects data (primarily based on location, soils information and selected conservation practice) and determines the environmental indices for the land offered.

FSA ranks each eligible offer in comparison to all other offers and selects from that ranking. After the enrollment period ends, the Secretary of Agriculture will decide where

to make the EBI cutoff. Those who have met previous EBI thresholds are not guaranteed a contract under this enrollment period. Producers may consult with local FSA and Natural Resource Conservation (NRCS) staff on how to maximize EBI points and increase the likelihood that their offer will be accepted.

More information on EBI for the CRP enrollment period is available by reading the FSA fact sheet, "**Conservation Reserve Program Enrollment, Environmental Benefits Index.**"

## CRP Continuous Enrollment

In addition to the CRP general enrollment period, producers at any time can participate in CRP continuous enrollment period, in which producers can enroll the most environmentally sensitive land. More information on CRP continuous enrollment is available in the FSA fact sheet, "**Conservation Reserve Program Continuous Sign-Up.**"

## More Information

This fact sheet is for informational purposes; other conditions may apply. Consult your local FSA office for details. For more information, contact your local service center and USDA Farm Service Agency office: [farmers.gov/service-locator](https://www.farmers.gov/service-locator).
