

Area	Waterfowl reports/Conditions
Copan	Habitat looks good in units and around the lake, just need lots of water fill both.
Deep Fork	Units have very little water at this time. Conditions should improve with rainfall.
Drummond	Wetland units are dry due to drought.
Ellsworth	Few ducks in the area. Conditions will improve with rainfall
Eufaula	Habitat condition poor at current lake level (5ft low). A few teal and mallards around the lake.
Ft. Cobb	Walnut Slough wetland dry due to renovation. Ft Cobb Lake 1.5 ft below normal. Low numbers of ducks and geese on lake.
Ft. Gibson	Lake level 2 ft below normal. Good habitat if water rises, rain needed. Birds are low in numbers
Grassy Slough	No water, units sprayed late summer, poor conditions due to drought and feral hogs. Some food + no water = no huntable ducks.
Hackberry Flat	All wetland units at Hackberry Flat are dry. Reservoir has about 5 acres of water and is draining due to a failed valve that will be replaced sometime this winter. No huntable waterfowl.
Hugo	Lake level low. Good habitat around shore line. Hunters should focus on Kiamichi River and the lake. Will improve with rain and if waterfowl remember which way is south.
Hulah	Habitat looks good in units and around the lake, just need lots of water fill both.
Keystone	Very poor habitat conditions around the lake, Keystone Lake is 5 feet low-use caution if using a boat. Cottonwood Creek WDU is being pumped-about 30% of the units are full. Very few ducks have been seen in the area.
Love Valley	Some decent food plant above elevation 616 on mudflats. Lake elevation is currently too low at 615. Few ducks in the area.
McClellan-Kerr	River system holding some birds on flats and pockets, water normal, habitat good. WDUs are dry due to pump failure
Mtn. Park	Wetland units dry due to drought (no pumpable water). Tom Steed lake 6 ft below normal. Low numbers of ducks and geese on the lake.
Okmulgee	Units have no water at this time. Conditions should improve with rainfall.
Oologah	Lake 1.15' below normal, lakeside and unit habitat fair to good, just need rain. Fair numbers of resident geese and low numbers of ducks seen
Packsaddle	Few ducks in the area. Conditions will improve with rainfall
Red Slough	Only reservoirs, Teal lake, and Blackjack have water. Plenty of food + no water = no huntable ducks. Will improve with rain. Gadwalls showing up in reservoirs roughly 1200.
Tishomingo	No food available at current water levels, waterfowl numbers very low
Waurika	Few ducks in the area. Conditions will improve with rainfall
White Grass	Unit is drained and pending mitigation with ODOT.
Wister	Unit is drained due to lack of rainfall and infrastructure needs
Sooner Lake	Migration beginning. Scaup, ringneck, redhead and a few canvasback make up divers. Mallard, northern shoveler, widgeon, and teal present in fair numbers. Canada geese also present.
