

Oklahoma Nest Box Survey

Survey Year: _____

County: _____

Observer Name: _____

Oklahoma's Wildlife Diversity Program is trying to enhance habitat for cavity nesting birds. To achieve this goal, the ODWC initiated the Oklahoma Nest Box Trails Project in 1985. This project depends entirely on volunteers to place the boxes, monitor usage, control competition from House Sparrows, and report the nesting season's results. To help you keep track of your totals, we've adapted this data sheet from Oklahoma Nest Box Survey participant Ann Freeman.
